SUMMARY

Systems Programmer graduate with hands-on experience developing backend solutions and application modernization projects using IBM Mainframe technologies. Seeking to begin a professional career in enterprise COBOL/Mainframe environments, contributing strong problem-solving skills, adaptability, and a continuous learning mindset.

EXPERIENCE

Personal Project / 2026 – Present

Insurance Claims Fraud Audit Modernization

Designed a proof-of-concept fraud auditing system integrating modern applications with COBOL-based legacy technology. Developed a REST API to bridge both environments, implemented batch processes to automate data processing and filtering, and built a reporting tool to simplify audit analysis.

COBOL JCL REXX DFSORT Java Spring Boot
REST API Zowe Git Docker RabbitMQ

Professional Internship / 2024 – 2026

Commercial Management System (IBM LinuxONE)

Implemented the batch processing layer of a commercial management system on IBM Mainframe architecture, developing file exchange processes and business rules for cost calculation, inventory control, and automated alerts.

COBOL GnuCOBOL s390x Architecture
IBM LinuxONE Batch Processing File Integration
IBM Db2 Git Linux Docker

Business Owner / 2021 – Present

Fotocopias Flopi

Manage daily business operations, customer service, printing services, and digital document solutions.

Document Processing Business Management
Canva AI Photoshop

SKILLS

Mainframe & Legacy: COBOL, JCL, REXX, DFSORT, VSAM, IBM Db2, IBM LinuxONE (s390x), Zowe, z/OSMF

Backend & Integration: Java, Spring Boot, Python, Flask, REST APIs, SQL, Batch Processing

Tools & Infrastructure: Git, GitHub, Docker, Linux, Postman, Maven

Software Engineering Practices: Refactoring, Code Analysis, Technical Documentation, AI-assisted Development (ChatGPT, Claude, Gemini)

ADDITIONAL PROJECTS

- Electronic Voting System (Java, MySQL)
- University Olympics Management Platform (PHP, MySQL, WampServer)
- Repair Management System (C, CMake)

EDUCATION

University Systems Programmer – (2026)

National University of Villa Mercedes – Argentina

Thesis Designed and implemented a hybrid inventory management system on IBM LinuxONE, integrating COBOL batch processing, a Python/Flask backend, and an IBM Db2 database.

CERTIFICATIONS

- IBM Coursera Mainframe Professional Certificates
- IBM Z Xplore – All Challenges Completed
- Modernize Applications with IBM CICS
- Front-End Web Development Bootcamp
- Python 101 for Data Science
- EF SET English Certificate – 55/100 (B2 Upper Intermediate)

LANGUAGES

- Spanish:** Native
- English:** B2 Intermediate (Technical Reading & Documentation)
