PROFILE

Junior COBOL developer with hands-on experience deploying batch applications on real IBM LinuxONE enterprise infrastructure (s390x). Designed, coded, and documented a production-grade hybrid system integrating COBOL batch, Db2, JCL, and Python Flask — graded 9/10. IBM Z Xplore All Star (Concepts + Advanced + All Star + Code-a-Thon). Experienced integrating AI tools (Claude, ChatGPT) into development workflows for code generation, documentation, and legacy system analysis. Available for full-time or part-time remote roles in mainframe development and modernization.

SKILLS

- **Mainframe Core:** COBOL (batch processing, control breaks, file handling), JCL, IBM Db2 (embedded SQL, ACID transactions, relational design), VSAM, z/OS, TSO/ISPF.
- **Mainframe Extended:** CICS (fundamentals, transaction processing), RACF (security, access control), IBM MQ (messaging concepts), IMS (fundamentals), zOSMF, Assembler (fundamentals), PL/I (fundamentals).
- **Mainframe Tools:** Zowe (CLI, Desktop, Explorer), z/OSMF, Ansible (mainframe automation), IBM Z Open Automation Utilities, Docker on s390x.
- **Backend & Integration:** Python (Flask, ibm_db, RESTful APIs), Bash, z/OS UNIX, Git/GitHub.
- **AI & Modernization:** Claude, ChatGPT applied to COBOL refactoring, legacy documentation, and code generation. Experience integrating AI tools into development workflows.
- **Other:** Java (OOP), C, PHP, SQL, HTML/CSS, Docker, Agile (Scrum).

EXPERIENCE

UNIVERSIDAD NACIONAL DE VILLA MERCEDES (UNVIME) CAPSTONE PROJECT — FINAL DEGREE (PPS)

📍 San Luis, Argentina

📅 Feb 2025 – Dec 2025

Project: Inventory Management System with Mainframe Architecture
github.com/Flor125/kiosco-management-system-mainframe

Client: Repo:

Role(s): Lead Developer — COBOL/Mainframe + Python Flask **Technologies:** COBOL, IBM Db2, JCL, LinuxONE s390x, Python Flask, Docker, HTML/CSS/JS

Responsibilities:

- **Only project in the cohort deployed on real IBM LinuxONE enterprise infrastructure (s390x)**, exposed to live internet traffic during production operation.
- Developed and debugged 500+ lines of structured COBOL batch programs for overnight processing: batch stock control, expiration alerts, and bulk price updates on IBM LinuxONE.
- Wrote JCL procedures for batch job execution and scheduling; implemented FEFO (First Expired, First Out) logic using flat-file architecture on s390x — mirroring patterns used in real-world banking and insurance mainframe systems.
- Designed normalized Db2 schema (8 relational tables) with ACID transactions and referential integrity for critical operation consistency.
- Integrated COBOL batch layer with Python Flask REST API; implemented RBAC (MANAGER/EMPLOYEE roles), pbkdf2:sha256 password hashing, CSRF protection, and complete audit logging.
- Audit logs documented and blocked real automated bot attacks, SQL injection attempts, brute force logins, and session hijacking attempts during production operation.
- Documented complete system architecture in a 56-page technical report including UML diagrams, use cases, and process documentation. Graded 9/10.

FOTOCOPIAS FLOPI

📍 San Luis, Argentina

OWNER & OPERATIONS MANAGER

📅 Oct 2024 – Present

- Manage daily operations of a print and digital services business: inventory of 50+ SKUs, pricing, supplier management, and client services.
- Apply AI tools (Claude, ChatGPT) daily to automate administrative workflows and support technical research and development tasks.

CERTIFICATIONS

	IBM Mainframe Developer Professional Certificate IBM / Coursera. 7-module specialization covering COBOL, JCL, Db2, z/OS, CICS, VSAM, and mainframe security.	 2024 – 2025
	IBM z/OS Mainframe Practitioner Professional Certificate IBM / Coursera. Covers z/OS operations, JCL, ISPF, RACF, and enterprise mainframe administration.	 2024 – 2025
	IBM Z Xplore All Star Concepts + Advanced + All Star + Code-a-Thon badges. 30+ technical badges covering COBOL, JCL, Db2, CICS, RACF, MQ, IMS, zOSMF, Assembler, PL/I, and Linux on Z.	 Oct 2024
	Fundamentals for Zowe Interskill Learning. Zowe CLI, Desktop, and Explorer for modern mainframe development workflows.	 2025

EDUCATION

UNIVERSITY DIPLOMA IN SYSTEMS PROGRAMMING (GPA: 8.43/10) Universidad Nacional de Villa Mercedes (UNViMe) 3-year university degree (ISCED 5). Capstone project graded 9/10 – only deployment on real IBM LinuxONE infrastructure in the cohort.	 Graduated: March 2026
